# POWERING INNOVATORS

## SHAPING THE FUTURE

Programming Courses  
for kids aged 5 - 18

- Will discover their talent in one of the promising areas of IT - from game design to machine learning
- Will put together a portfolio of their own games, sites and apps.
- Will learn to love science subjects and get a whole new perspective on their studies.

## Programming in Scratch Jr

**For ages 5 - 7**

Kid's first dive into the fascinating world of algorithms and code, carried out in a play format and through the development of logical thinking skills

## Technology Literacy

**For ages 7 - 9**

Students learn to use productivity tools like google Docs, Spreadsheets, and Presentation software to organize and share their work. They also explore the basics of graphic design, online communication and digital safety.

## Programming in Scratch

**For ages 9 - 10**

Programming basics taught using the scratch programming language for kids. Students get to create their own games and cartoons.

## Programming in Game design

**For ages 10 - 11**

Students learn how to create their own exciting games using the Lua programming language, building immersive worlds and interactive experiences. With Roblox Studio's tools, they'll bring their game ideas to life.

## Robotics

**For ages 9 - 11**

Students explore the exciting world of robotics, from understanding fundamental tools and components to mastering the secrets of building and programming their own robots.

## Graphic Design

**For ages 9 - 14**

Students dive into the creative world of visual communication, learning essential design tools and techniques while discovering how to craft visuals that captivate and guide a viewer's attention.

## Web Development Level 1

**For ages 15 - 18**

Students learn the basics of HTML, CSS, and JavaScript to create dynamic web pages, design user friendly interfaces, and bring their creative ideas to life in the digital world.

## Python Level 1

**For ages 12 - 13**

Students get an introduction to python programming language, create their own AI chatbot, and explore design through math by crafting creative art with Turtle graphics.

## Python Level 2

**For ages 14 - 17**

Students dive into advanced topics like mobile app development, backend web development with Django, and machine learning. By the end of the course, they'll be building apps, powering websites, and exploring AI like pros!
